

Foam Tipped Swab

Polystyrene Handle

Description

Professional sampling swab, head sponge material is made of 100PPI medical grade polyester sponge and bonded with medical water-based glue, which is environmentally friendly. PS rod has radiation resistance and will not turn yellow after irradiation sterilization with reagents.

Dimensions

Total length 148 mm
Break point length 80mm
Head length 15mm

Quality

- Medical quality,
- Sponge swab head has good collection and release performance
- Comfortable sponge sampling brush head for patients
- Can be used dry or in combination with a liquid medium
- Made in Shanghai, China

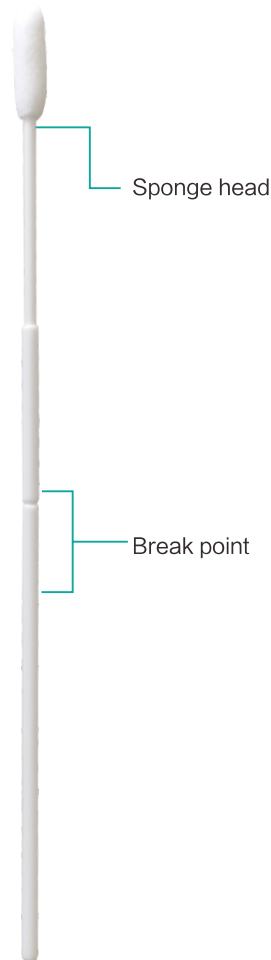

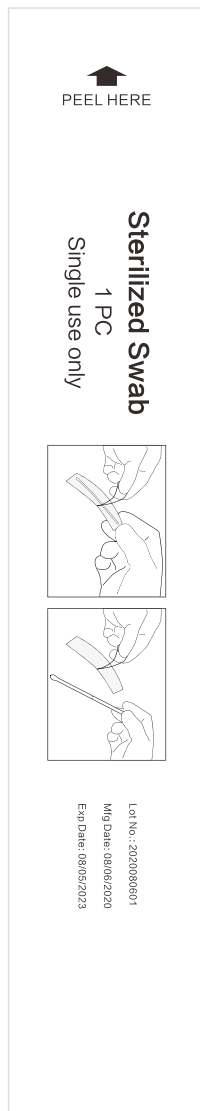

Use

- Collecting oral exfoliated cells
- For general sample collection for testing and screening
- Applications for pediatrics, ophthalmology, veterinary care and oropharynx
- Sampling fittings in rapid diagnostic kits

Model	Package Specifications
Foam swab Type Y1	1 pouch, 2 pouches, 5 pouches, 10 packs, 50 packs, 50 packs, 100 pcs/box, 1000 pcs/box, 2000 pcs/box

Foam Tipped Swab

Polystyrene Handle

Description

Professional sampling swab, head sponge material is made of 100PPI medical grade polyester sponge and bonded with medical water-based glue, which is environmentally friendly. PS hollow rod has radiation resistance and will not turn yellow after irradiation sterilization with reagents. Can be broken at any point 90 degrees

Dimensions

Total length 148 mm
Break point length 80mm
Head length 15mm

Quality

- Medical quality,
- Sponge swab head has good collection and release performance
- Comfortable sponge sampling brush head for patients
- Can be used dry or in combination with a liquid medium
- Made in Shanghai, China

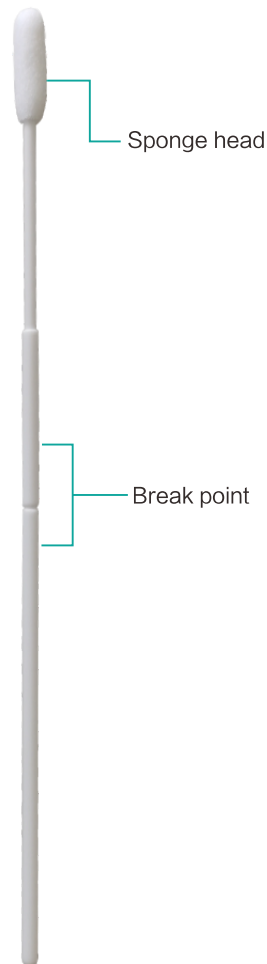

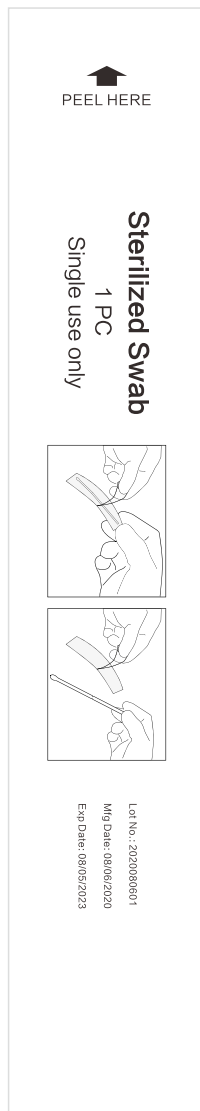

Use

- Collecting oral exfoliated cells
- For general sample collection for testing and screening
- Applications for pediatrics, ophthalmology, veterinary care and oropharynx
- Sampling fittings in rapid diagnostic kits

Model	Package Specifications
Foam swab Type Y2	1 pouch, 2 pouches, 5 pouches, 10 packs, 50 packs, 50 packs, 100 pcs/box, 1000 pcs/box, 2000 pcs/box

Foam Tipped Swab

Polystyrene Handle

Description

Professional sampling swab, head sponge material adopts 100PPI medical grade polyester sponge, adopts medical water-based glue adhesion, is environmentally friendly, PP injection molded handle

Dimensions

Total length 148 mm
Break point length 80mm
Head length 20mm

Quality

- Medical quality,
- Sponge swab head has good collection and release performance
- Comfortable sponge sampling brush head for patients
- Can be used dry or in combination with a liquid medium
- Made in Shanghai, China

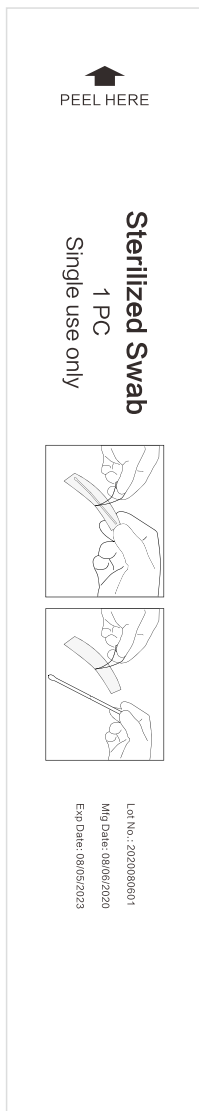

Use

- Diagnostic tests for nasal and anterior nostril specimen collection
- For general sample collection for testing and screening
- Applications for pediatrics, ophthalmology, veterinary care and nasal cavity
- Samples from rapid diagnostic kits

Model	Package Specifications
Foam swab Type B	1 pouch, 2 pouches, 5 pouches, 10 packs, 50 packs, 50 packs, 100 pcs/box, 1000 pcs/box, 2000 pcs/box

Foam Tipped Swab

Polystyrene Handle

Description

Professional sampling swab, head sponge material adopts 100PPI medical grade polyester sponge, adopts medical water-based glue adhesion, is environmentally friendly, PP injection molded handle

Dimensions

Total length 148 mm
Break point length 30mm
Head length 25mm

Quality

- Medical quality,
- Sponge swab head has good collection and release performance
- Comfortable sponge sampling brush head for patients
- Can be used dry or in combination with a liquid medium
- Made in Shanghai, China

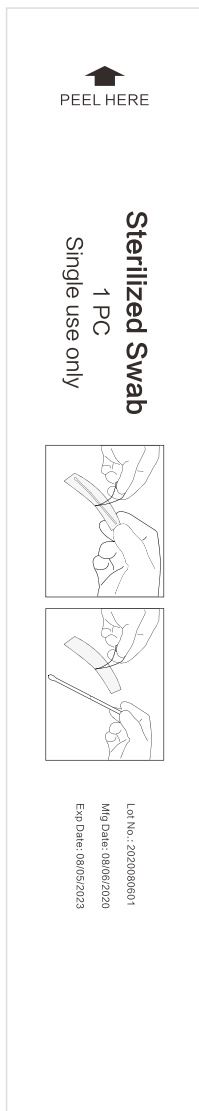

Use

- Collecting oral exfoliated cells
- For general sample collection for testing and screening
- Applications for pediatrics, ophthalmology, veterinary care and oropharynx
- Sampling fittings in rapid diagnostic kits

Model	Package Specifications
Foam swab Type K	1 pouch, 2 pouches, 5 pouches, 10 packs, 50 packs, 50 packs, 100 pcs/box, 1000 pcs/box, 2000 pcs/box

Foam Tipped Swab

Polystyrene Handle

Description

Professional sampling swab, head sponge material adopts 100PPI medical grade polyester sponge, adopts medical water-based glue adhesion, is environmentally friendly, PP injection molded handle

Dimensions

60 mm in length
Head length 20mm

Quality

- Medical quality, Sponge swab head has good collection and release performance,
 - Ultra-fast absorption without waiting
- Can be used dry or in combination with a liquid medium,
- Made in Shanghai, China

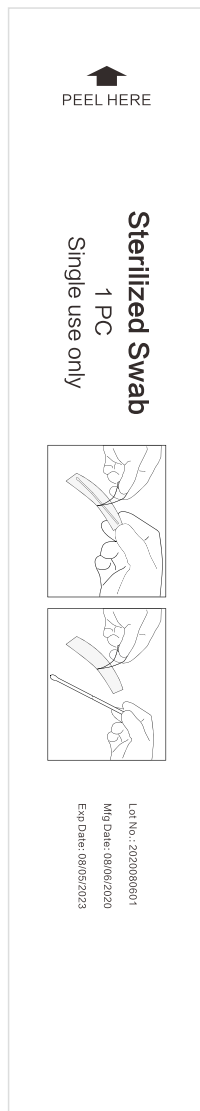

Use

- For urine collection
- For general sample collection for testing and screening
- Sampling fittings in rapid diagnostic kits

Model	Package Specifications
Foam swab Type N	1 pouch, 2 pouches, 5 pouches, 10 packs, 50 packs, 50 packs, 100 pcs/box, 1000 pcs/box, 2000 pcs/box

Polyester Cloth Tipped Swab

Polystyrene Handle

Description

Professional sampling swab, head is made of polyester fiber textile cloth, polyester cloth swab does not use glue, PP injection molded handle

Dimensions

Total length 148 mm
Break point length 80mm
Head length 15mm

Quality

- Medical quality,
- Polyester cloth swab head has good collection and release performance
- Comfortable polyester sampling brush head for patients
- Can be used dry or in combination with a liquid medium
- Made in Shanghai, China

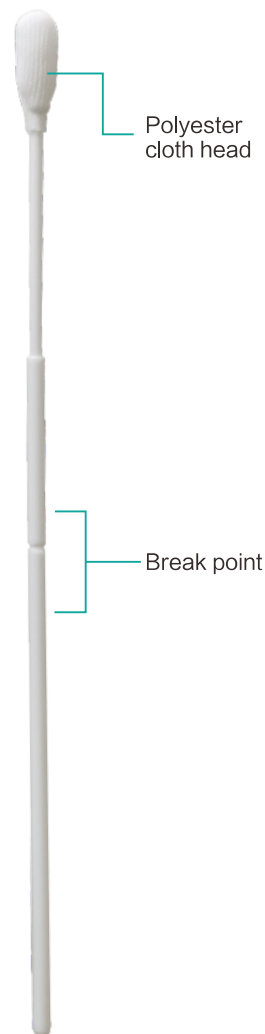

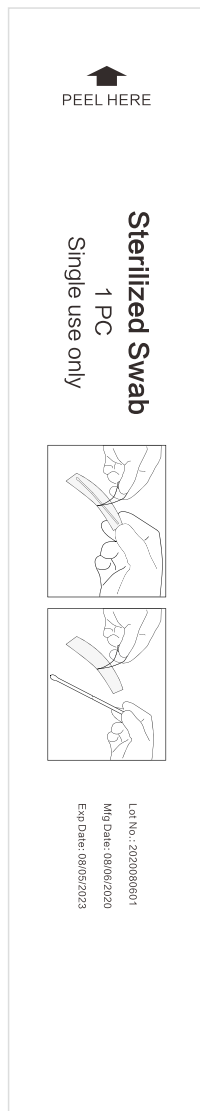

Use

- Collecting oral exfoliated cells
- For general sample collection for testing and screening
- Applications for pediatrics, ophthalmology, veterinary care and oropharynx
- Sampling fittings in rapid diagnostic kits

Model	Package Specifications
Polyester cloth swab Type Y	1 pouch, 2 pouches, 5 pouches, 10 packs, 50 packs, 50 packs, 100 pcs/box, 1000 pcs/box, 2000 pcs/box

Polyester Cloth Tipped Swab

Polystyrene Handle

Description

Professional sampling swab, head is made of polyester fiber textile cloth, polyester cloth swab does not use glue, PP injection molded handle

Dimensions

Total length 148 mm
Break point length 80mm
Head length 25mm

Quality

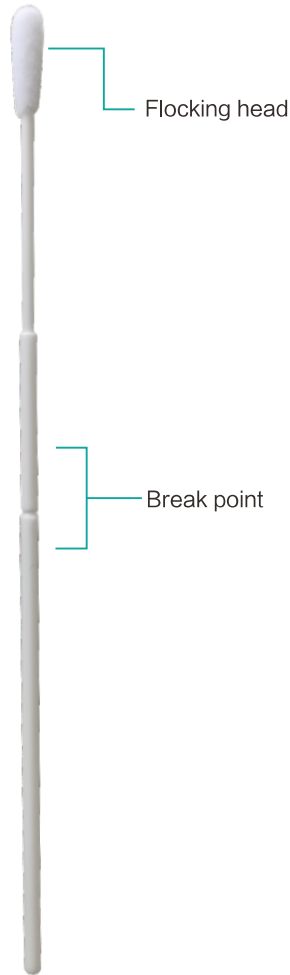

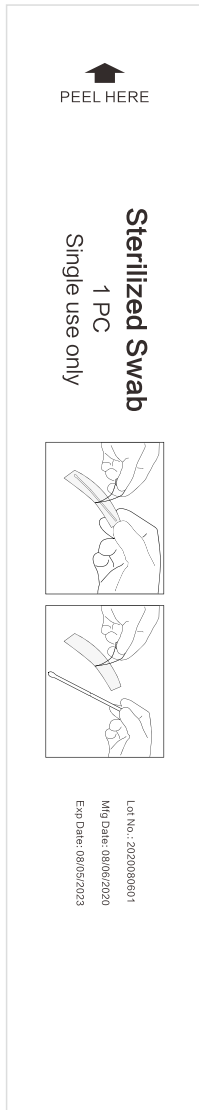

- Medical quality,
- Polyester cloth swab head has good collection and release performance
- Comfortable polyester sampling brush head for patients

- Applications for pediatrics, ophthalmology, veterinary care and oropharynx
- Sampling fittings in rapid diagnostic kits

Model	Package Specifications
Polyester cloth swab Type K	1 pouch, 2 pouches, 5 pouches, 10 packs, 50 packs, 50 packs, 100 pcs/box, 1000 pcs/box, 2000 pcs/box

Flocking Tipped Swab

Description

Professional sampling swab, the head is bonded with nylon fluff and medical water-based glue, which is environmentally friendly and has good biocompatibility. Latex-filled glue forms a cortex, so that electrostatic flocking fluff can be inserted into the glue layer at an angle of 90 degrees, and the amount of fluff implanted is large. PS rod has radiation resistance and will not turn yellow after irradiation sterilization with reagents.

Dimensions

Total length 148 mm
Break point length 80mm
Head length 16mm

Quality

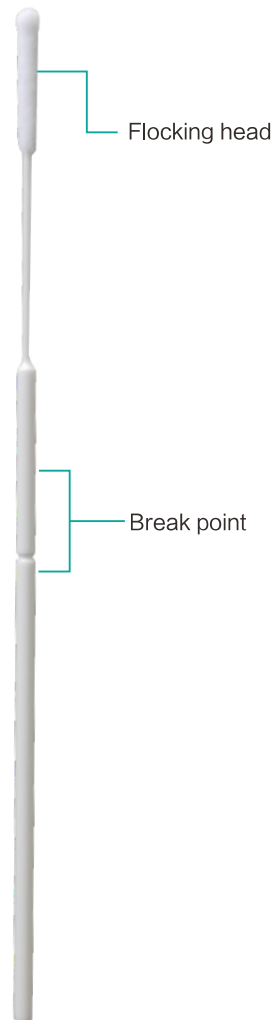

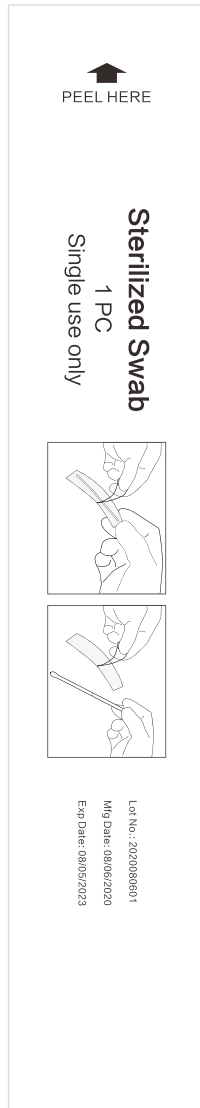

- Medical quality,
- Flocking swab head has good collection and release performance
- Comfortable flocking sampling brush head for patients
- Can be used dry or in combination with a liquid medium
- Made in Shanghai, China

Use

- Collecting oral exfoliated cells
